Profile

AI Solution Architect currently broadening my expertise through an MSc in Artificial Intelligence at the University of Edinburgh, with hands-on experience in AI engineering and designing scalable, production-grade AI systems. Designed 4+ system architectures for AI solutions across B2B and B2C environments. Experienced in leading R&D research initiatives focused on emerging AI technologies, with strong communication and cross-functional coordination skills.

Education

University of Edinburgh

MSc in Artificial Intelligence

Edinburgh, UK

Sep 2026 - Present

- Developing projects focused on precise decision-making using AI and Machine Learning.
- Courses:** Accelerated and Advanced NLP, Machine Learning Systems, Machine Learning Practical, Text Technologies for Data Science.

St. Joseph's College of Engineering

B.E. in Computer Science and Engineering

Chennai, India

Aug 2020 - Mar 2024

- Graduated with Distinction.
- Completed projects in AI and Machine Learning on "AI-based Analytics for Electric Battery Life Prediction".

Work Experience

Zeb AI

Solution Architect

Chennai, India

Feb 2026 - Sep 2026

- Zeb AI is the parent company of Avasoft.
- Pioneered an extensible execution and test harness for an AI agentic coding system, building a modular adapter layer that integrated 15+ data sources and reduced setup time by 40%.
- Spearheaded the deployment of cross-platform applications across 5 targets (Web, macOS, Windows, iOS, Android), delivering real-time streaming response latencies under 200ms.

Avasoft

Solution Architect

Chennai, India

Dec 2023 - Jan 2026

- Collaborated directly with UK-based SaaS product leaders to define architecture and engineer 12+ custom agentic AI workflows, driving a 35% reduction in manual execution times.
- Delivered and deployed the multi-tenant agentic platform into production, reliably scaling to serve active users across 200+ distinct enterprise organizations.

Featured Projects

Decision & Comparison Conversational Agent

University of Edinburgh

Edinburgh, UK

Sep 2026 - Present

- Architected a dual-mode conversational agent evaluating 10+ multi-criteria trade-offs simultaneously, reducing user prompt ambiguity by 45% through proactive constraint resolution.
- Engineered an auditable reasoning framework achieving a 95%+ factual attribution rate across source documents while maintaining zero hallucinated assumptions in baseline tests.
- Implemented a dual-speed routing engine delivering sub-500ms response times in Faster Mode while improving complex scenario conflict detection accuracy by 30% in Deep-Thinking Mode.
- Constructed an automated evaluation benchmark across 500+ test scenarios, increasing intent classification accuracy to 92% post fine-tuning.
- Technical Skills:** Python, LLM Orchestration, Retrieval-Augmented Generation (RAG), Multi-Criteria Decision Analysis, Evidence Frameworks, Intent Classification.

Multi-Source Agentic Coding Pipeline

Zeb AI

Chennai, India

Feb 2026 - Sep 2026

- Developed a context-aggregation pipeline synthesizing data across 4 major enterprise tools (Jira, GitHub, OneDrive, Email) to construct unified context windows exceeding 100k tokens.
- Automated code-generation workflows yielding 70%+ first-pass acceptance rates on boilerplate code, cutting initial project setup time from days to under 30 minutes.
- Structured a plug-and-play adapter layer enabling dynamic onboarding of new data sources within <5 minutes without requiring core engine redeployments.
- Built an extensible orchestration engine scaling across 4 functional domains (Dev, QA, Infra, Sales Automation) and supporting execution of 10,000+ monthly agent tasks.
- Technical Skills:** Python, Agentic AI, AWS Architecture, Cloud-Native Development, Isolated Sandbox Environments, LLM Orchestration, RAG, Multi-Modal Ingestion.

Multi Agent Orchestration for Data Warehousing

Chennai, India

Avasoft

Jun 2025 - Jan 2026

- Architected a multi-agent framework utilizing custom MCP servers, querying 10M+ rows across Snowflake and Databricks with sub-second retrieval latency.
- Created a modular ecosystem of 20+ internal Python libraries powering inter-agent workflows, authoring 7 core libraries from scratch and co-developing the shared tool suite.
- Designed a provider-agnostic "Bring Your Own LLM" (BYOLLM) abstraction supporting 10+ LLM providers, embedding dynamic analytics dashboards seamlessly into the client's SaaS platform.
- Partnered with engineering leadership to build a horizontally scalable system achieving 99.9% uptime and powering concurrent queries across 200+ isolated tenant environments.
- Migrated a 15k+ LOC legacy Java codebase to Python, reducing microservice API latency by 25% and standardizing codebase maintainability across the team.
- Technical Skills:** Python, Multi-Agent Systems, Model Context Protocol (MCP), BYO-LLM Architecture, Microservices, SaaS Integration, REST APIs.

Skills

AI	Agentic AI, Multi-Agent Systems, Model Context Protocol (MCP), LLM Orchestration, RAG, Model Evaluation & Benchmarking, Model Fine-Tuning.
ML	Deep Learning (CNNs, Transformers), Natural Language Processing (NLP), PyTorch, TensorFlow, Scikit-learn.
Languages	Python, Rust, ReactJS/TS, SQL, Shell Scripting (Bash/Zsh), REST APIs.
Cloud & Tools	AWS Architecture, Azure Architecture, GCP Architecture, Cloud-Native Development, Isolated Sandbox Environments, Databricks, Docker, Linux, Git.

Languages

English	Professional proficiency
Tamil	Native proficiency
Hindi	Intermediate proficiency

Achievements

Sep 2024	Databricks Certified Machine Learning Professional	India
Aug 2024	Databricks Certified Machine Learning Associate	India
Jul 2024	Databricks Certified Generative AI Engineer Associate	India

Interests

Badminton	Active player focusing on agility, tactical placement, and competitive gameplay.
Chess	Enthusiastic player passionate about strategic planning, opening theory, and rapid games.
Rifle Shooting	Practitioner of precision target shooting, cultivating focus, discipline, and breath control.
Technical Writing	Authoring insights on emerging AI & ML architectures on LinkedIn, alongside in-depth analyses of novel open-source GitHub repositories and tools on Medium.
