Profile

AI and Full-Stack Solution Architect currently pursuing an MSc in Artificial Intelligence at the University of Edinburgh, with hands-on experience in AI engineering and delivering scalable, production-grade systems. Formulated 4+ AI and full-stack system blueprints across B2B and B2C environments. Experienced in directing R&D initiatives focused on emerging AI and full-stack technologies, with strong expertise in technical problem-solving, communication, and cross-functional collaboration.

Education

University of Edinburgh

Edinburgh, UK

MSc in Artificial Intelligence

Sep 2026 - Present

- Developing advanced projects focused on high-precision decision-making systems using AI and Machine Learning.
- Courses:** Accelerated and Advanced NLP, Machine Learning Systems, Machine Learning Practical, Text Technologies for Data Science.

St. Joseph's College of Engineering

Chennai, India

B.E. in Computer Science and Engineering

Aug 2020 - Mar 2024

- Graduated First Class with Distinction (CGPA: 9.17/10).
- Completed project: "AI-based Analytics for Electric Battery Life Prediction".
- Courses:** Full Stack Web Development, Internet Programming, Database Management Systems, Object Oriented Analysis & Design, Distributed Systems, Cloud Computing, Computer Networks.

Work Experience

Zeb AI

Chennai, India

Solution Architect

Feb 2026 - Sep 2026

- Zeb AI is the parent company of Avasoft.
- Pioneered an extensible execution and test harness for an AI agentic coding system, constructing 5+ modular, plug-and-play adapter layers to seamlessly integrate arbitrary input and output data sources.
- Spearheaded full stack development and deployment of cross-platform client applications across 4 major OS targets (Web, macOS, Windows, iOS & Android), connecting responsive frontend interfaces with backend AI orchestration via real-time WebSocket APIs delivering sub-200ms message latency.

Avasoft

Chennai, India

Solution Architect

Dec 2023 - Jan 2026

- Collaborated directly with 5+ UK-based SaaS product leaders to define technical strategy and deploy custom agentic AI pipelines tailored for complex enterprise use cases.
- Delivered end-to-end full stack architecture for the multi-tenant agentic SaaS platform, building responsive frontend interfaces and high-throughput REST APIs that reliably scaled across 200+ enterprise organizations.

Featured Projects

Enterprise AI Assistant Platform

Chennai, India

Full-Stack Developer / Technical Lead - Avasoft

May 2024 - Dec 2024

- Developed and evolved one of the company's most widely used internal AI chatbot platforms serving 500+ active users, contributing initially as a Full-Stack Developer and later progressing to Technical Lead.
- Architected scalable frontend and backend systems using React, TypeScript, FastAPI, and Django, powering 10+ production-grade AI chatbot solutions across the organization.
- Integrated HTTP- and WebSocket-based communication between 15+ microservices, facilitating both synchronous API interactions and real-time bidirectional streaming.
- Implemented a Backend-for-Frontend (BFF) pattern to abstract underlying microservices, reducing API response times by 35% and streamlining frontend integration.
- Orchestrated the platform's disaster recovery architecture and deployment strategy, achieving 99.9% system uptime and resilience during infrastructure failures.
- Deployed CDN-based frontend delivery to improve application performance by 40% and ensure low-latency loading for a large internal user base.
- Technical Skills:** Python, React, TypeScript, JavaScript, Tailwind CSS, FastAPI, Django, Microservices, WebSockets, REST APIs, BFF Architecture, CDN, RDS, SQL, File Systems.

Custom Enterprise Project Management Platform

Chennai, India

Technical Lead - Avasoft

Jan 2025 - May 2025

- Led a cross-functional development team of 6 engineers in building a customized project management platform tailored to organizational operations across 3 internal business units.
- Created a configurable platform capable of adapting to varying project complexities, reducing project onboarding time by 50% across enterprise teams.
- Owned the end-to-end technical delivery across 10+ sprint cycles, coordinating requirements, code reviews, and technical decision-making while actively contributing to implementation.
- Authored and presented a working product demonstration that successfully migrated 100+ active team members from generic tools like Jira to the internal custom platform.
- Identified and resolved underlying operational bottlenecks, improving task completion tracking accuracy by 40% across organization-wide projects.
- Collaborated with 12+ stakeholders across multiple management levels to translate operational requirements into scalable features.
- **Technical Skills:** Python, Full-Stack Development, System Architecture, Project Management Systems, Workflow Automation, Database Design, API Development, Agile Development, Team Leadership.

Multi Agent Orchestration for Data Warehousing

Chennai, India

Avasoft

Jun 2025 - Jan 2026

- Established a multi-agent orchestration framework utilizing custom Model Context Protocol (MCP) servers to interface autonomous agents with enterprise data warehouses, including Snowflake and Databricks.
- Engineered a modular ecosystem of 20+ internal Python libraries powering inter-agent data flow, authoring 7 core libraries from scratch and co-developing the shared tool suite.
- Formulated a provider-agnostic “Bring Your Own LLM” (BYOLLM) abstraction supporting 10+ LLM providers, embedding dynamic analytics dashboards seamlessly into the client’s SaaS platform.
- Partnered with veteran engineering and product leadership to set up a horizontally scalable architecture ensuring enterprise-grade data security and multi-tenant performance.
- Refactored a critical Java-based codebase into Python to achieve seamless microservice integration and unified API compatibility across the multi-agent framework.
- **Technical Skills:** Python, Multi-Agent Systems, Model Context Protocol (MCP), BYO-LLM Architecture, Microservices, SaaS Integration, REST APIs.

Multi-Source Agentic Coding Pipeline

Chennai, India

Zeb AI

Feb 2026 - Sep 2026

- Constructed an agentic context-aggregation pipeline leveraging AWS OpenSearch for full-text and vector indexing across 4+ enterprise tools—synthesizing Jira stories, GitHub repositories, OneDrive PRDs, and client email specifications into a unified query context.
- Automated code-generation pipelines to synthesize multi-source requirements into high-quality first-cut codebases, accelerating initial feature prototyping by 60% and shifting developer focus toward high-level problem-solving.
- Designed a flexible plug-and-play adapter layer supporting 10+ data source connectors for dynamic onboarding accessible across desktop and mobile clients.
- Built the underlying orchestration engine with cross-domain extensibility, scaling the framework across 3 additional operational domains including QA testing, cloud infrastructure, and sales automation.
- **Technical Skills:** Python, Agentic AI, AWS Architecture, AWS OpenSearch, Cloud-Native Development, Isolated Sandbox Environments, LLM Orchestration, RAG, Multi-Modal Ingestion.

Skills

AI & ML	Agentic AI, Multi-Agent Systems, Model Context Protocol (MCP), LLM Orchestration, RAG, PyTorch, TensorFlow, NLP.
Frontend	React, TypeScript, JavaScript, Tailwind CSS, WebSockets, REST APIs, Microservices, BFF Architecture.
Backend & Data	Python, FastAPI, Django, SQL (PostgreSQL), NoSQL, AWS OpenSearch/Elasticsearch, Databricks, Snowflake, Rust.
Cloud & Tools	AWS Architecture, Azure, GCP, Cloud-Native, CDN, Isolated Sandboxes, Docker, Linux, Git.

Languages

English	Professional proficiency
Tamil	Native proficiency
Hindi	Intermediate proficiency

Achievements

Sep 2024	Databricks Certified Machine Learning Professional	India
Aug 2024	Databricks Certified Machine Learning Associate	India
Jul 2024	Databricks Certified Generative AI Engineer Associate	India
